PROJECTS

- **Weather Dashboard**   1 month
  I'm a budding web developer passionate about turning real-time data into simple, useful applications. Recently, I built a **Weather Dashboard** that fetches live weather information using APIs and displays it in a clean, user-friendly interface.
  Tech: HTML, CSS, Javascript, Bootstrap, MySQL, PHP, MIT App Inventor

- **Task Management App**   1 month
  A **Task Management App** helps users create, organize, and track their tasks efficiently. It improves productivity by allowing users to set deadlines, prioritize tasks, receive reminders, and monitor progress. The app is ideal for students, professionals, and teams to manage daily routines, projects, and goals.
  Tech:
  Frontend:
  - **HTML**
  - **CSS**
  - **JavaScript**

  Backend (optional):
  - None, or simple **Node.js + Express** for storing tasks

  Database (optional):
  - LocalStorage (Offline)
  - JSON file
  - MongoDB (if using backend)

- **My Diary App**
  The Diary App is a simple and user-friendly application designed to help users record, organize, and revisit their daily thoughts and activities in digital form. The main purpose of this app is to replace traditional paper diaries with a secure, accessible, and easy-to-use digital solution.
  The app allows users to create daily entries, update past entries, and delete information whenever needed.
